

British Standard Pipe Tapered Information / Identification

BSPT connections, just as NPT connections, seal by thread interference. BSPT connections are the same as JIS Tapered Pipe, Whitworth Tapered Pipe (inch threads), and ISO Tapered Pipe Thread. For hydraulic applications, they are most commonly found on Japanese Equipment, therefore usually being JIS Tapered Pipe Thread.

Most of *our* Male BSPT connections are offered with a 30° chamfered seat, giving them the ability to seal against a BSPP 30° Cone Female Swivel, as well as by thread interference in a female tapered port (figure below).

Measurement Procedure

1. With calipers, measure the O.D. (outer diameter) of the male threads or the I.D. (inner diameter) of the Female threads.
2. Check the thread pitch with the thread pitch gauges.
3. Compare measurements against chart.
